Port of Seattle  
P.O. Box 1209  
Seattle, Washington 98111

Dear Mr. Aggerholm:

This is in response to your letter of November 10, 1988. I understand that Chempro has agreed to meet with you on a regular basis to discuss activities at this facility. I also understand Mr. Peter Ressler of Chempro has already provided you with a copy of the latest 3013 workplan that you requested in your letter. For any additional reports or plans generated by Chempro, we suggest you contact them directly for a copy, if you have not already been provided with one.

As a result of our review of the revised 3013 workplan, approval was granted by the Environmental Protection Agency (EPA) on November 15, 1988. With regard to any future plans submitted to EPA by Chempro, the Port of Seattle can submit comments to EPA on these plans. These comments will be considered during the EPA review process. Also, during the closure process there will be a formal 30-day comment period. EPA will address any comments received during this comment period prior to any approval, or modification and approval, of the closure plan(s).

We look forward to your involvement with this facility. If you have questions regarding the Pier 91 facility, please contact me at 442-2806.

Sincerely,

Bill Adams  
RCRA Compliance
